

TURNOUT CLASS This class takes into account the horse, vehicle, harness and the general appearance of the whole turnout. Points are allocated as follows: Horse /50, Vehicle /30, Harness /10, General Appearance /10, for a total of 100. A close inspection should be made of the vehicle and harness, before the workout is performed. The vehicle and harness should be safe, clean and in good condition. See below for what to look for when judging the horse.

Suggested Workout:

HORSE OR PONY CLASS In this type of class, *only* the horse or pony is judged. The vehicle and harness should be safe but are not taken into account. Look for a horse which has a relatively high head carriage, is moving evenly front and back and displaying a degree of knee and hock action. Impulsion, rhythm and balance are important. Should be asked for a short walk and then trot on both reins, and may be asked to rein back.

Suggested Workout

HACKNEY HORSE OR PONY Similar workout to open class but reinbacks and walks are usually left out in a specific class for hackneys. However if a hackney appears in an open class it should be expected to perform the same workout as the other horses/ponies. In hackneys, look for a high head and tail carriage, with extravagant high stepping action front and back, and an even flowing forward movement, covering the ground.

Suggested Workout:

HEAVY HORSE CLASS Look for an alert horse with proud head and neck carriage and an active flowing and free moving step, based on an even straight gait in all four legs. A delivery horse should have good knee and hock action with a ground covering stride. The workout should include a walk, a trot (unless the vehicle is unsprung), a rein back and a fan on each rein.

Suggested Workout:
